Genuine Parts

An ELME spreader consists of more than 3,000 parts – all carefully designed and built to provide the highest possible level of **performance**.

Elme Genuine Parts, our range of approved spare parts and accessories, are 100% made for your ELME spreader – with the exact right qualities, dimensions and features – to secure the **reliability** and **safety** of your product. To make the ownership even more straightforward, we've introduced "ELME in a box". A complete package of all the genuine parts your spreader needs for a 5 000 hour service. An easy way of securing the **performance** and **safety** of your spreader for years to come!

On a number of our spare parts we expand **safety** and traceability with a tooled product labeling, everything to improve the certainty of using genuine parts. Another example of this process is our twistlock certificate. This document ensures the origin and quality of the twistlocks and certifies that the twistlocks are tested.

By using ELME genuine parts, you always get parts you can rely on and true peace of mind. If you are using non-genuine parts, you put weak links into a strong, perfectly designed chain of interactive components.

Every single part of an ELME spreader is built at our plant in Älmhult, Sweden. And that's the way it's been since 1974. All the work is carried out here - from design and product development to manufacturing, assembling and testing. This unique approach lets us have 100% control over the production and the final quality of our products. It's our way to ensure the **performance**, **reliability** and **safety**.

ELME in

n a box.

ELME in a box

The idea of ELME service box is to facilitate service job and preventive maintenance of the spreader by boxing up selected genuine parts. The box includes all the parts we consider needed to be replaced at service. Purchasing the service box directly together with an equipped machine ensures that the ELME spreader continues to hold a high level in terms of its dependability and reliability. Additionally it ensures low downtime and is more economical than buying all the parts individually. Even better is that it keeps the spreader in good condition by regularly service checkups!

One part number – easy to order

Immediate shipment from stock

Genuine parts – ensure the quality

Service manual – inside the box

ELME service boxes

Since the release of the service box concept we've broaden the range of boxes to now cover up for the majority of ELME truck spreader models.

Service boxes are available for the following ELME spreader models:
