MODEL 582LT INNOVATION [E]

FOR EMPTY CONTAINER HANDLING WITH LIFT TRUCKS

Standard supply includes:

- Integrated mounting to fit the truck
- Powered pile slope (PPS)
- Mechanical pile slope (MPS), floating function in the end-posts
- Four hydraulic horizontal ISO twistlocks
- Hydraulic telescoping
- Hydraulic sideshift
- Solenoid valves for all hydraulic functions
- Electrical and mechanical twistlock protection system
- Electric twistlock indication
- Electric telescoping protection system
- Lift interrupt signal
- 2x6 LED indication lights
- 4x LED work lights (1000 lumen/light)

The ELME Spreader Model 582LT INNOVATION is the New Generation telescopic side lift spreader with 11 tonnes capacity for handling two empty ISO/reefer containers simultaneously. The containers are engaged by four horizontal twistlocks inserted into the side apertures of the container's top and lower corner castings.

The spreader is designed to be integrated in the mast of a forklift truck and can handle one or two ISO/reefer and Binnen containers in 20 to 40ft. Special for 582LT INN. is that the spreader can double handle tank containers.

582LT INN. can double handle 45ft containers in 40ft's corner castings and drive in free speed.

The spreader has a low single profile type mainframe which enhances visibility when high stacking.

INNOVATIVE DESIGN

INNOVATION's unique 11 tonnes capacity designed for heavy duty double handling applications, combined with handling eccentric load, makes it possible to handle double reefer containers with the refrigeration units aligned.

The new and improved design implies a reinforced spreader with an increased structural strength, enhanced durability, beneficially designed Power pile slope (PPS), optimized hydraulic system, increased visibility for the driver and numerous other improvements for an outstanding functionality.

TWISTLOCK SYSTEM

582LT INN. has hardened ISO quick exchange twistlocks, hydraulically activated and mechanical interlocking against faulty locking and unloc-

king. An ELME patent covers the innovative horizontal twistlock principle which offers the following features:

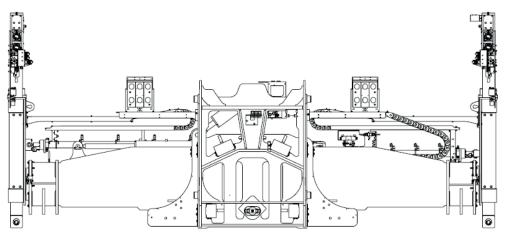

- Four purposely designed twistlocks enter the side apertures of the containers top and bottom corner castings, locking the spreader onto the containers positively and safely.
- Upper twistlocks are extendable/retractable to ensure pick up from a misaligned container stack.
- 582LT INNOVATION's width is adapted to the dimensions of the container, which means that all containers can be fully block stacked and still remain accessible.
- When handling tank containers, the driver is allowed to retract the upper twistlocks an additional 55 mm for container stack line up.
- Manually adjustable bottom support

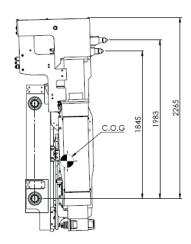

CONTROL AND PROTECTION SYSTEM

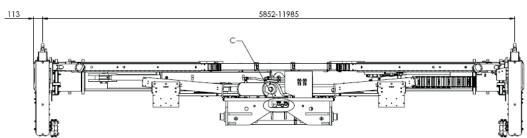

The ELME Neuron CAN bus system, designed for maximum robustness, monitors the state of the spreader at all times. Indicator lights advise the operator when the spreader is correctly seated, locked or not locked. Each signal is a precondition for the important protection functions of the spreader such as twistlock activation, telescoping and lift interrupt.

MODEL 582LT INNOVATION[E]

TECHNICAL SPECIFICATIONS	
Type of lifting system	Four horizontal twistlocks
Type of stacking	Normal and block stacking
Spreader weight (TW)	4 700 kg
Carriage weight (PPS)	Approx. 1 900 kg
Lifting capacity (SWL)	11 tonnes
Telescopic positions	20 and 40ft
Telescoping speed, 20-40ft	< 12 sec.*
Telescoping speed, 40-20ft	< 14 sec.*
Sideshift	± 600 optional ± 400 mm
Mechanical pile slope (MPS), vertical floating end-posts	At 20ft position: approx. 200mm At 40ft position: approx. 200mm
Powered pile slope (PPS)	± 6°
Hydraulics, operating pressure up to	140 bar
Hydraulics, flow	Max. 60 L/min
Electric - control voltage	24 VDC
Communication	CAN 2.0B
Colour	Black grey RAL 7021

* Calculated speed at 60 L/min

All specifications are subject to change without notice. A list of options enables you to adapt the product more precisely to your needs and further information is available on request.

Improved design with built-in cabling and larger bending radius for hydraulic hose between pocket and end-post.
