

SUSTAINABILITY POLICY

ELME Spreader AB

ELME Spreader AB's sustainability work aims to take such responsibility for the environment that inconveniences or damage to nature and people does not occur. We comply with current regulations and legislation. We are responsive to stakeholder requirements and participate in relevant industry initiatives.

Preventive and targeted environmental work is of great importance, which we achieve by:

- Take environmental considerations into account in decisions and actions – big or small.
- Fulfil current legal requirements and other mandatory requirements.
- Work on continuous improvements around our climate footprint regarding energy efficiency, internal and external transportation, emissions, and waste.
- Ensure environmental knowledge adapted to our various tasks.
- Encourage suggestions for improvement and make use of employee commitment.
- Set relevant environmental requirements on our partners and suppliers.
- Develop and offer efficient products that generate environmental benefits for our customers.

Our goal is to offer the best, most relevant and most environmentally efficient products on the market in container handling. As high a percentage as possible of all raw materials must be recyclable.

ELME Spreader AB's products must have a long service life, and with this, large environmental benefits are generated as well as financial gains. Our environmental ambitions shall strengthen our competitiveness and relevance in the market.
